

Emulacija računalnika ZX Spectrum z vpogledom v stanje sistema

Avtor: Klemen Remec

Mentor: izr. prof. dr. Jurij Mihelič

Fakulteta za računalništvo in informatiko,
Univerza v Ljubljani

Povzetek

- ZX Spectrum 48K: zgodovina, zgradba
- cilj dela
- razvoj in končna implementacija
- pregled in ovrednotenje končnih rezultatov

ZX Spectrum 48K - Zgodovina

ZX Spectrum 48K - Zgradba

Razvoj - Arhitektura

Moduli funkcionalnosti:

- Processor
- Memory
- ULAScreen , ULAKeyboard ,
ULATapeDeck , ULABeeper

The screenshot displays the 'subspectrum' emulator interface, which is divided into several sections:

- Registers:** This section is further divided into three sub-sections:
 - Main register set:** A table showing registers A through C with their current values. For example, A is FA, B is C6, C is 05, D is 1F, E is 26, F is 32, H is 59, L is FA, and C is 0.
 - Alternate register set:** A table showing alternate registers A' through C' with their current values. For example, A' is 00, B' is 10, C' is 00, D' is 36, E' is 9B, F' is 44, H' is 27, L' is 58, and C is 0.
 - Special purpose registers:** A table showing registers I, R, IX, IY, SP, and PC with their current values. For example, I is 3F, R is 5C, IX is 0000, IY is 84A1, SP is 9CFC, and PC is 9302.
- Disassembly:** This section shows the current instruction being executed, along with its address and the values of the registers involved. For example, the instruction at address 9302 is 'DEC E'.
- Memory:** This section shows the current memory address and the data stored at that address. For example, the memory at address 9300 contains the value 1D.
- Game Screen:** A small window titled 'subspectrum screen' showing a game titled 'MANIC MINER'. The game screen displays a colorful landscape with a sun, trees, and a mine. The text 'MANIC MINER' and 'PRESS ENTER TO START' are visible on the screen.

sub spectrum screen

A screenshot of a ZX Spectrum game titled "Central Cavern". The game is displayed on a red background. The main play area shows a character (a small figure) in a cave environment with various platforms and obstacles. The character is currently on a platform. The game interface includes a title bar "Central Cavern" and a status bar at the bottom showing "AIR" (a green bar), "High Score 000100", and "Score 000200". The game is running on a ZX Spectrum computer, as indicated by the "sub spectrum" text in the top left corner of the window.
